

Bibliography

April 19 1999

This is still full of holes!

- Abraham, R. and Marsden, J. (1985)** Foundation of Mechanics, 3d Edition, Addison–Wesley
- Aubry, S. and Le Daeron, P.Y. (1983)** The discrete Frenkel-Kontorova model and its extensions. I. Exact results for ground states, *Physica* 8D
- Aubry, S. and Abramovici, G. (1990)** Chaotic trajectories in the standard map: the concept of anti-integrability, *Physica D* 43
- S. Aubry, R. MacKay & C. Baesens (1991)** Equivalence of uniform hyperbolicity for symplectic twist maps and phonon gap for the Frenkel-Kontorova models, *Physica D* 56
- Angenent, S. (1988)** The Periodic orbits of an area preserving twist map, *Comm. in Math. Physics* vol 115, no3
- Angenent, S. (???)** Monotone recurrence relations, their Birkhoff orbits and topological entropy; *Ergod. Th. and Dynam. Sys.* 10
- Angenent, S. & Golé, C. (1991)** Lamination by Ghost Circles, ETH, Zürich.
- Arnaud, M.C. (1992)** Sur les points fixes des difféomorphismes exacts symplectiques de $T^*\mathbb{T}^n \times \mathbb{R}^n$, *C.R. Acad. Sci. Paris*, t.309, Série I
- Arnaud, M.C. (1992)** Type des points fixes des difféomorphismes symplectiques de $T^*\mathbb{T}^n \times \mathbb{R}^n$, *Mémoire n° 48, Supplément au bulletin de la S.M.F.*, Tome 120, fasc. 1
- Arnold, V. (1963)** Small denominators and problems of stability of motion in classical and celestial mechanics, *Russ. Math. Surv.*, 18
- Arnold, V. (1965)** Sur une propriété topologique des applications globalement canoniques de la mécanique classique, *C.R. Acad. Sci. Paris Série I Math.* 261, Groupe 1
- Arnold, V. (1978)** *Mathematical Methods of Classical Mechanics*, Springer-Verlag
- Arnold, V. (1983)** *Geometric methods in the theory of ordinary differential equations*, Springer–Verlag
- Bangert, V. (1988)** Mather sets for twist maps and geodesics on tori, *Dynamics reported* 1
- Bangert, V. (1989)** Minimal Geodesics, *Ergod. Th. & Dynam. Sys.*, 10
- Bernstein, D. and Katok, A. (1987)** Birkhoff periodic orbits for small perturbations of completely integrable Hamiltonian systems with convex Hamiltonians, *Invent. Math.* 88
- Birkhoff (1920)** Surface transformations and their dynamical applications. *Collected Math. Papers*, vol. 2
- Bialy, M. and Polterovitch, L. (1992)** Hamiltonian systems, Lagrangian tori and Birkhoff’s Theorem, *Math. Ann.* 292
- Boyland, P. (1996)** New Dynamical Invariants on Hyperbolic Manifolds, Preprint
- Bost, J–B. (1986)** Tores invariants des systèmes dynamiques Hamiltoniens, *Séminaire Bourbaki* no. 639, *Astérisque* 133-134
- Boyland, P. (1988)** Rotation sets and Morse decomposition for twist maps, *Ergod. Th. & Dynam. Sys.* 8
- Boyland, P. and Golé, C. (1996a)** Dynamical stability in Lagrangian systems, in *Hamiltonian Systems with Three or More Degrees of Freedom*, C. Simó, editor, Kluwer Acad. Publ., Dordrecht, Holland.
- Boyland, P. and Golé, C. (1996b)** Lagrangian systems on hyperbolic manifolds, to appear in *Ergod. Th. & Dynam. Sys.*
- (See also www.math.sunysb.edu/cgi-bin/preprint.pl?ims96-1a)
- Candel, A. & de la Llave, R. (1997)** On the Aubry-Mather theory in statistical mechanics, *Comm. Math. Phys.* 192 no. 3

- Guillou, L. (1992)** A generalized translation theorem for free homeomorphisms of surfaces, Preprint No. 217 of Institut Fourier, Grenoble
- Hall, G. (1984)** A topological version of a theorem of Mather on twist maps, *Ergod. Th. and Dynam. Sys.* 4
- Hall, G. (1989)** A topological version of a theorem of Mather on shadowing in monotone twist maps. *Dynamical systems and ergodic theory (Warsaw, 1986)*, Banach Center Publ., 23, PWN, Warsaw
- Hedlund (1932)** Geodesics on a two-dimensional Riemannian manifold with periodic coefficients, *Ann. Math.* 33
- Herman, M. (1983)** Sur les courbes invariantes par les difféomorphismes de l'anneau, vol. I, *Asterisque*, 103-104
- Hermann, M. (1990)** Inégalités à priori pour des tores lagrangiens invariants par des difféomorphismes symplectiques, *Publ. Math. I.H.E.S.* 70
- Herman, M. (1992a)** On the dynamics of Lagrangian tori invariant by symplectic diffeomorphisms. *Progress in variational methods in Hamiltonian systems and elliptic equations (L'Aquila, 1990)*, Pitman Res. Notes Math. Ser., 243, Longman Sci. Tech., Harlow
- Herman, M. (1992b)** Dynamics connected with indefinite normal torsion, in *Twist mappings and their applications*, IMA volume 44, Springer-Verlag
- Hirsch, M. (1988)** Stability and convergence in strongly monotone dynamical systems *J. reine angew. Math.* 383
- Hirsch, M. and Smale, S. (1974)** *Differential equations, dynamical systems and linear algebra*, Academic Press
- Katok, A. (1982)** Some remarks on Birkhoff and Mather twist map theorems, *Ergod. Th. & Dynam. Sys.*, 2
- Katok, A. (1992)** Minimal orbits for small perturbations of completely integrable Hamiltonian systems, in *Twist mappings and their applications*, IMA volume 44, Springer-Verlag
- Katznelson, Y. and Ornstein, D. (???)** Aubry-Mather via trimming ???
- Kolmogorov, A. (1954)** The general theory of dynamical systems and classical mechanics, address to the 1954 International Congress of Mathematicians, English translation in the appendix of Abraham & Marsden (1985)
- Kook, H. and Meiss, J. (1989)** Periodic orbits for Reversible, Symplectic Mappings, *Physica D* 35
- Hasselblat, B. and Katok, A. (1995)** *Hasselblat & Katok (1995) (1995) Introduction to the modern theory of dynamical systems*, Cambridge University Press.
- Klingenberg, W. (1982)** *Differential geometry*, Klewer ???
- Koch, H., de la Llave, R. & Radin, C. (1994)** Aubry-Mather theory for functions on lattices. *Discrete Contin. Dynam. Systems* 3, no. 1
- Delshams, A., de la Llave, R., Seara, T. M. (1998)** A geometric approach to the existence of orbits with unbounded energy in generic periodic perturbations by a potential of generic geodesic flows of T^2 . Preprint 98-591 available at http://rene.ma.utexas.edu:80/mp_arc/.
- de la Llave, R. (1999)** Variational methods for quasi-periodic solutions of partial differential equations, preprint
- Lang, S. (1983)** *Real Analysis*, Addison-Wesley
- Laudenbach & Sikorav (1985)** Persistance d'intersection avec la section nulle au cours d'une isotopie hamiltonienne dans un fibré cotangent, *Invent. Math.* 82
- LeCalvez, P. (1990)** IMPA ???
- LeCalvez, P. (1991)** Propriétés dynamiques des difféomorphismes de l'anneau et du tore, *Astérisque* 204
- LeCalvez, P. (???) GCs** Find his paper where GCs are constructed ???.
- Levi M. (???)** His Aubry-Mather theorem on the Hedlund example (*Erg. Th. Dyn. Sys (1997)???*)
- Lochak, P. (1992)** Canonical perturbation theory via simultaneous approximation, *Russ. Math. Surv.* 47:6
- McDuff, D. and Salamon, D. (1996)** *Introduction to Symplectic Topology*, Oxford Mathematical Monographs
- MacKay, R. (???)** Twist maps, renormalization ???
- MacKay, R. and Meiss, J. (1983)** Linear stability of periodic orbits in Lagrangian systems, *Phys. Lett.* 98A, 92
- MacKay, R., Meiss, J. & Percival, I. (1984)** Transport in Hamiltonian systems, *Physica* 13D
- MacKay, R., Meiss, J. & Percival, I. (1986)** Resonances in area-preserving maps, *Physica* 27D
- MacKay, R., Meiss, J. and Stark, J. (1989)** Converse KAM theory for symplectic twist maps, *Nonlinearity* 2
- MacKay, R. & Muldoon, M. GCs...**

- Mañe, R. (1987)** Ergodic theory and differentiable dynamics, Springer-Verlag
- Mané, R. (1991)** Global variational methods in conservative dynamics, 18^o Colóquio Brasileiro de Matemática, IMPA
- Mather, J. (1982)** Existence of quasiperiodic orbits for twist homeomorphisms, *Topology* 21
- Mather, J. (1984)** Non-existence of invariant circles, *Ergod. Th. & Dynam. Sys.* 2
- Mather, J. (1986)** A criterion for the non-existence of invariant circles *Publ. Math. I.H.E.S.* 63
- Mather, J. (1991b)** Action minimizing invariant measures for positive definite Lagrangian systems, *Math. Z.* 207
- Mather, J. (1993)** Variational constructions of connecting orbits, *Ann. Inst. Fourier, Grenoble* 43, No. 5
- Mather, J. (diffusion???)** Recent work on diffusion ???
- Meiss, J. (1992)** Symplectic maps, variational principles, and transport, *Rev. Mod. Phys.* 6, No. 3
- Milnor, J. (1969)** Morse theory, Princeton University Press
- Moser, J. (1962)** On invariant curves of area-preserving mappings of an annulus, *Nachr. Akad. Wiss. Göttingen, Math. Phys. Kl.II* (see also the next reference)
- Moser, J. (1973)** Stable and random motions in dynamical systems, Princeton University Press
- Moser, J. (1977)** Proof of a generalized form of a fixed point theorem due to G.D. Birkhoff, *Lecture Notes in Mathematics, Vol. 597: Geometry and Topology*, pp. 464-494, Springer
- Moser, J. (1986)** Monotone twist mappings and the calculus of variations, *Ergod. Th. and Dyn. Sys.*, Vol 6
- Nekhoroshev, M. (1977)** An exponential estimate of the time of stability of nearly integrable Hamiltonian systems, *Russ. Math. Surv.* 32, No. 6
- Percival (1979)** A variational principle for invariant tori of fixed frequency, *J. Phys. A* 12
- Pöshel, J. (1993)** Nekhoroshev estimates for quasi-convex Hamiltonian systems. *Math. Z.* 213, No. 2
- Poincaré, H. (1885)** Sur les courbes définie par les équations différentielles, Chapter XV, *Journal de Mathématiques pures et appliquées, 4^e série, t.1* (this and the following two references can be also found in the “*Œuvres complètes de Henri Poincaré*”, Gauthier Villar, (1951))
- Poincaré, H. (1890)** Sur le problème des trois corps et les équations de la dynamique, *Acta Math.* 13
- Poincaré, H. (1895)** Analysis situs, *J. de l'École Polyt. (2)* 1
- Poincaré, H. (1912)** Sur un théorème de géométrie, *Rand. Circ. Math. Palermo*, 33
- Poincaré, H. (1892)** Les méthodes nouvelles de la mécanique céleste (3 volumes), Gauthier-Villars, Paris
- Robinson, C. (1970)** Generic properties of conservative systems, *Am. Jour. Math.*, Vol XCII, No. 3
- Robinson, C. (1994)** *Dynamical Systems*, CRC Press
- Rom-Kedar, V. & Wiggins, S. (1990)** Transport in two-dimensional maps, *Arch. Rat. Mech. & Anal.* Vol 109, Number 3
- Rüssmann, H. (1970)** Kleine Nenner I: Über invarianten Kurven differenzierbarer Abbildungen eines Kreisringes, *Nachr. Akad. Wiss. Göttingen, Math. Phys. Kl.*
- Salamon, D. (???)** Conley index....????
- Salamon, D. (1990)** Morse Theory, the Conley index and Floer homology, *Bull. London Math. Soc.* 22
- Siburg, K.F. (1995)** Symplectic Capacities and Bi-invariant Metrics on Hamiltonian Diffeomorphisms, Thesis Diss. Nr.11110, ETH Zürich
- Sikorav (1986)** Sur les immersions lagrangiennes dans un fibré cotangent admettant une phase génératrice globale, *C.R. Acad. Sci. Paris, t. 302, Série I. n^o 3*
- Slijepčević, S. (1999a)** Monotone gradient dynamics and Mather's shadowing, *Nonlinearity* 12, no. 4
- Slijepčević, S. (1999b)** Accelerating orbits of twist diffeomorphisms on a torus, *Glas. Mat. Ser. III* 34(54) (1999), no. 1
- Spivak, M. (1970)** A comprehensive introduction to differential geometry, Vol 1, Publish or Perish
- Tabacman, E. (1993)** Ph.D. Thesis, University of Minnesota.
- Tabacman, E. (1995)** Variational computation of homoclinic orbits for twist maps, *Phys. D* 85 (1995), no. 4
- Tangerman, F, and Veerman, JP. (1989)** Renormalization of Aubry-Mather Cantor sets, *J. Statist. Phys.* 56, no. 1-2
- Tangerman, F, and Veerman, JP. (1990a)** On Aubry-Mather sets. *Phys. D* 46, no. 2
- Tangerman, F, and Veerman, JP. (1990b)** Asymptotic geometry of hyperbolic well-ordered Cantor sets, *J. Statist. Phys.* 59 (1990), no. 1-2
- Tangerman, F. and Veerman, JP. (1991)** Intersection properties of invariant manifolds in certain twist maps, *Commun. Math. Phys.* 139
- Theret, D. (1999)** A complete proof of Viterbo's uniqueness theorem on generating functions, *Topology Appl.* 96 , no. 3

- Weinstein, A. (1979)** Lectures on Symplectic Manifolds, CBMS series no. 29, A.M.S.
- Viterbo, C. (1987)** Intersection de sous variétés Lagrangiennes, fonctionnelles d'action et indice de systèmes Hamiltoniens, Bull. Soc. math. France 115
- Viterbo, C. (1992)** Symplectic topology as the geometry of generating functions, Math. Ann. 292
- Weinstein, A. (1979)** Lectures on symplectic manifolds, C.B.M.S. Conf. Series, no.29, AMS
- Wiggins, S. (1990)** On the geometry of transport in phase space. I. Transport in k-degree-of-freedom Hamiltonian systems, $2 \leq k < \infty$, Physica D 44
- Yoccoz, J.-C. (1992)** Travaux de Herman sur les tores invariants, Séminaire Bourbaki no. 754, Astrisque No. 206

What about: Delshams, A.(E-UPB-A1); Ramírez-Ros, R.(E-UPB-A1) Exponentially small splitting of separatrices for perturbed integrable standard-like maps. (English. English summary) J. Nonlinear Sci. 8 (1998), no. 3, 317–352. (the first rigorous proof of exponentially small splitting? write Amadeu...)

Index

A

action, 21
 α -asymptotic, 207
annulus, 15
anti-integrable, 147
attaching a cell, 194
attaching map, 194
average action, 153

B

base, 16β (Mather's minimal action function), 153
Betti number, 198
billiard map, 26
boundary twist condition, 16, 162
bouquet of spheres, 196

C

cell, 193
cellular space, 194
chain complex, 197
cohomology, 199
cohomology Conley index, 205, 210
Conley index, 210
contractible, 200
convexity
–of Lagrangians, 149
completely integrable, 23
completeness (of E–L flow), 149
covering map, 199
covering space, 199
critical point, 201
cuplength, 206
cup product, 199
CW complex, 194
cylinder, 15

D

degree, 15, 196
DeRham cohomology group, 199
dimension,
–of a cell complex, 194

E

elliptic fixed point and periodic orbit, 24
embedding, 16
equivalent (gpqi's), 214
ergodic, 151
Euler characteristic, 198
Euler–Lagrange (E–L) flow, 148
evenly covered, 199
exit set, 205
extreme points, 152

F

fiber, 16

filtration, 210
finite cell complex, 194
flux, 17
fundamental group, 200

G

generalized Mather sets, 154
generating function
– of a twist map, 19
– of a Lagrangian manifold, 214
generating phase, 213, 214
– quadratic at infinity, 214
gpqi, 214
gradient, 202
gradient flow, 201

H

homology group, 197,
homotopic, 196
homotopy type, 198
hyperbolic fixed point and periodic orbit, 24

I

index pair, 210
induced, 15
isolating block, 205
isolated invariant set, 210
isotopic to Id, 18

J

K

L

lift, 199

M

maximal invariant set, 205
minimal measure, 153
minimizer
–for a Lagrangian system, 149
 (m, n) ,
– sequences, 22
orbits, 22
monotone recurrence relation, 146
Morse decomposition, 207
Morse function, 201
Morse index, 201
Morse–Smale function, 204

N

nondegenerate,
–critical point, 201

O

ω -asymptotic, 207
orbit, 20

P

phonon gap, 150
Poincaré polynomial, 210
 $\pi_1(M, z_0)$, $\pi_1(M)$, 200

Q

R

related by continuation, 212
retraction, 207
rotation number, 22
backward and forward –, 22
– of a point, 22
rotation vector
–of a curve on a manifold, 152
–of a curve on a hyperbolic manifold, 158
–of an invariant measure 152

S

shear map, 23
simply connected, 200
skeleton, 194
space average, 151
stabilization (of gpqi's), 214
stable norm, 156
standard map, 23
strip, 15
sublevel sets, 202
subsolution (for a monotone recurrence relation), 146
sum of the Betti numbers, 206
superlinearity, 149
superquadraticity, 157
support (of a measure), 151
symplectic
– form,
tilt map, 21
time average, 150
Tonelli's theorem, 149
twist condition, 16
twist map
–(area preserving, monotone) of the annulus, 16
– positive or negative, 16

U

universal cover, 200
universal abelian cover, 200

V

unstable manifold, 202

W

weak* limit, 151

X

Y

Z
